 Huawei	SFP-GE-SX-M M850A	X	SFP-GE-LX-SM 1310A	SFP-GE-LH40-SM1310 SFP-GE-LH40-SM1550	SFP-GE-LH70-S M1550	SFP-GE-T		

Cell Optical SFP Access also available for long haul connectivity up to 110km, BWDM (BX) up to 80km, multi-rate from 125M up to 2.67Gbps, CWDM/DWDM/10G SFP and with Digital Monitoring (DM) function for service monitoring management platform.

Cell NetsAccess is Cell's innovative Network Multi-Service Access solution which is specialized and designed for integrated network/optical access solutions to the fiber optic network, Metro Ethernet and transport services for service providers. Cell Technology has unique relevant field experience in Metro Ethernet access and optical transport offers the best in class intelligent network integrated solution to address the business requirements of QoS (Quality of Service), SLA (Service Level Agreement) and OAM (Operation, Administration & Maintenance) service aspects deployment for service providers. Cell NetsAccess solution combined of the best technologies with Cell network & security products, 10Gbps switches & optical access, Cell Optical SFP (Small Form Factor Pluggable) pluggable access, Cell NetsVision service management platform. This intelligent and integrated Network Multi-Service Access solution has powerful capabilities such as network security and resiliency, traffic management, service differentiation and the capabilities to diagnose, troubleshoot and isolate network service problems remotely from operation centre to meet the carrier level expectations of service providers for completely managing and monitoring the network services.

About Cell Technology

Cell Technology headquartered at Hong Kong SAR, a network & security technology provider specializes in design, develop and deliver innovative and intelligent IP packet processing platform into software and hardware appliances. Cell product solutions including Cell IPS, UTM, CMC, Janus, TMS, NetsVision and NetsAccess address the business needs that optimize the IP network performance, secure the network security and resiliency, and manage the quality of IP services.
